CHASING HIGHER PERFORMANCE THROUGH
CRAFT AND INNOVATION SINCE 1946.

BEYOND WHAT I SEE

Years from now, this racquet will be lighter and stronger than you could ever picture. Fully packed with new innovations. All those innovations are bound to be discovered. They're all hidden, impatiently waiting to be uncovered.

When I get my hands on this racquet, it will be the culmination of thousands of ideas, tried and failed. It will be standing proof, that endlessly testing both expected and unexpected ideas will mold the basis for game-changing performance.

But this racquet won't uncover itself — not without a little imagination.

It's time I search beyond what I know today.

OUR RANGE OF —

RACKETS

“ENGINEERED FOR YOUR GAME.”

Badminton racquets were the start of the Yonex journey into sports. With each racquet developed, our vision became clearer. We learned the fun of crafting world-class racquets alongside the most elite players and now, we strive for innovative racquets that help every athlete achieve new speeds and new heights.

We believe the best performance cannot be prepared with just any ingredient. Every gram, every millimeter can be the deal-maker or -breaker. That's why we source the highest quality advanced graphite for our chefs to personally cook up into each individual masterpiece.

ISOMETRIC™

SIGNATURE YONEX TECHNOLOGY SINCE 1980*

SWEET SPOT EXPANSION

ISOMETRIC™ technology was invented by Yonex to maximize the vital sweet spot area and is now a world-leading feature of our rackets. The squareshaped head of the racket means that there are more strings crossing at right angles, resulting in a bigger sweet spot. Yonex continues to develop and enhance ISOMETRIC™ power, reducing still further the 'inert' space around the edge of conventional rackets, creating a far bigger sweet spot than other frames.

ISOMETRIC™ is a trademark of Yonex Co., Ltd. *Tested by Yonex

*Originally developed for tennis rackets, in 1992 Yonex released the first ISOMETRIC badminton racket.

POWER

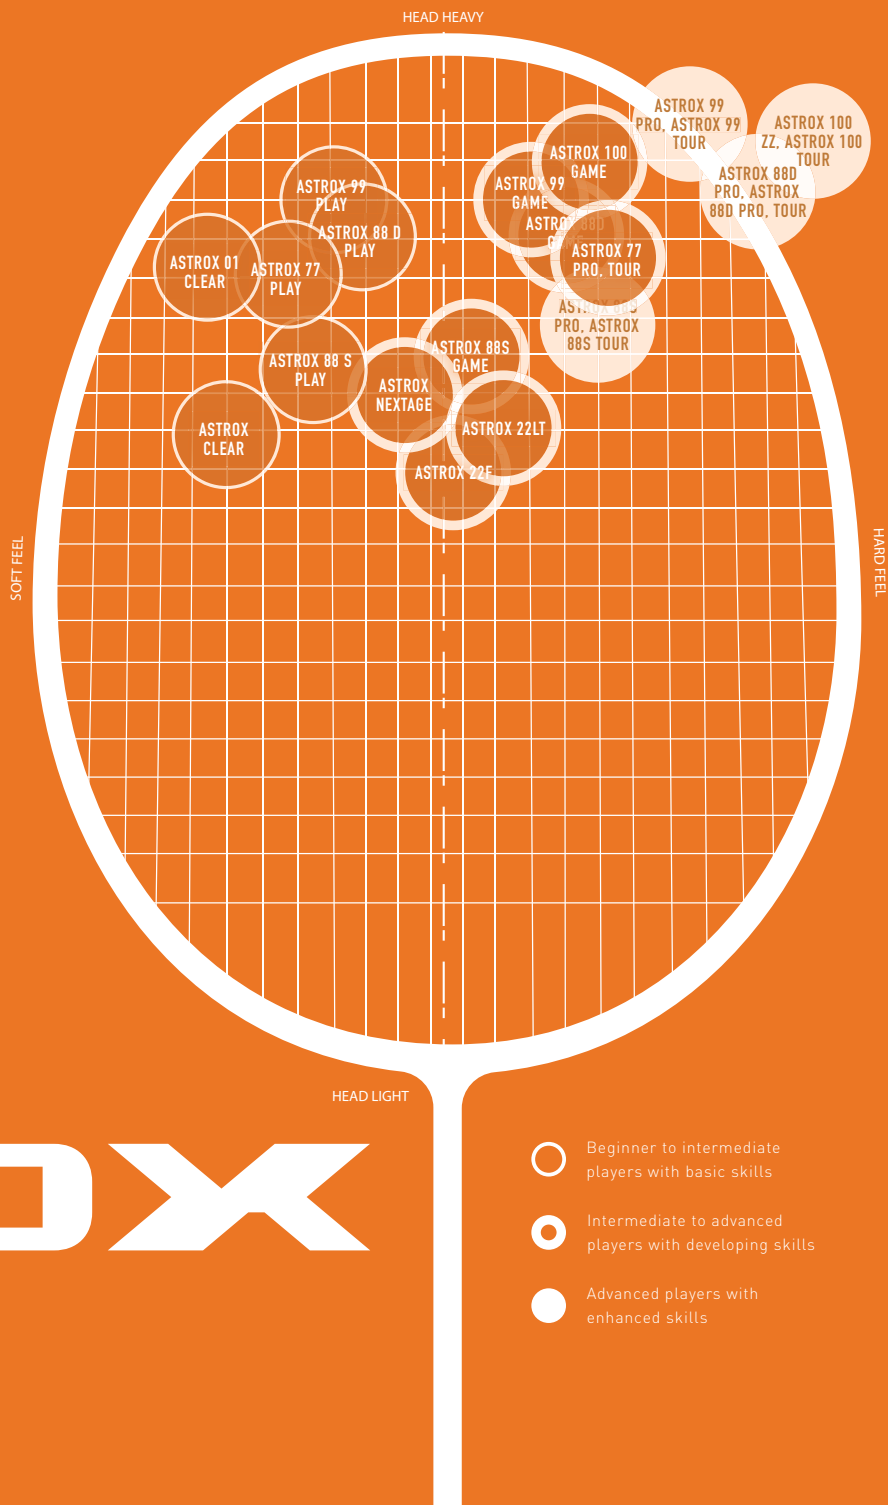

INITIATE A RELENTLESS ATTACK

The ASTROX series is developed to meet the demands of aggressive attacking play, taking the point to your opponent with relentless steep attacks.

The Rotational Generator System perfectly distributes weight through the grip end, frame top and the T-joint for maximum control, enabling smooth transition between shots, in a rapid succession. Revolutionary graphite materials such as Namd™* are utilized to produce Namd™* and faster snapback for imposing power.

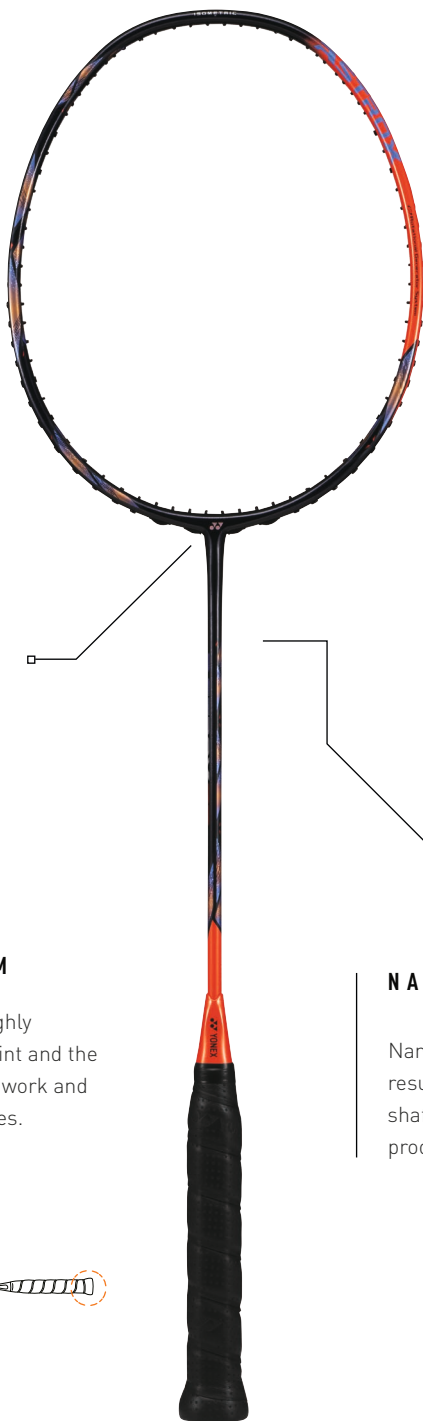

ASTROX ASTR

* Namd™ is a technology developed by Nitta Corporation to "uniformly disperse carbon nanotubes into carbon fiber composites."

OX

- ◐ Intermediate to advanced players with developing skills
- Advanced players with enhanced skills

FLEX FUSE

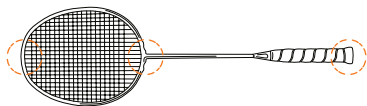

The shock absorbing resin used in the joint creates a comfortable hitting feel.

ROTATIONAL GENERATOR SYSTEM

Weight is distributed thoroughly throughout the frame top, joint and the grip end for smooth racquet work and successive, powerful smashes.

NAMD™

Namd™ situated in the shaft results in a large increase in shaft flex and snap back speed, producing explosive smashes.

SPEED

MAXIMUM SHUTTLE ACCELERATION

Engineered to improve swing speed and maneuverability, the NANOFLARE is the only head-light racquet proven to provide unrivaled power and increased shuttle acceleration.

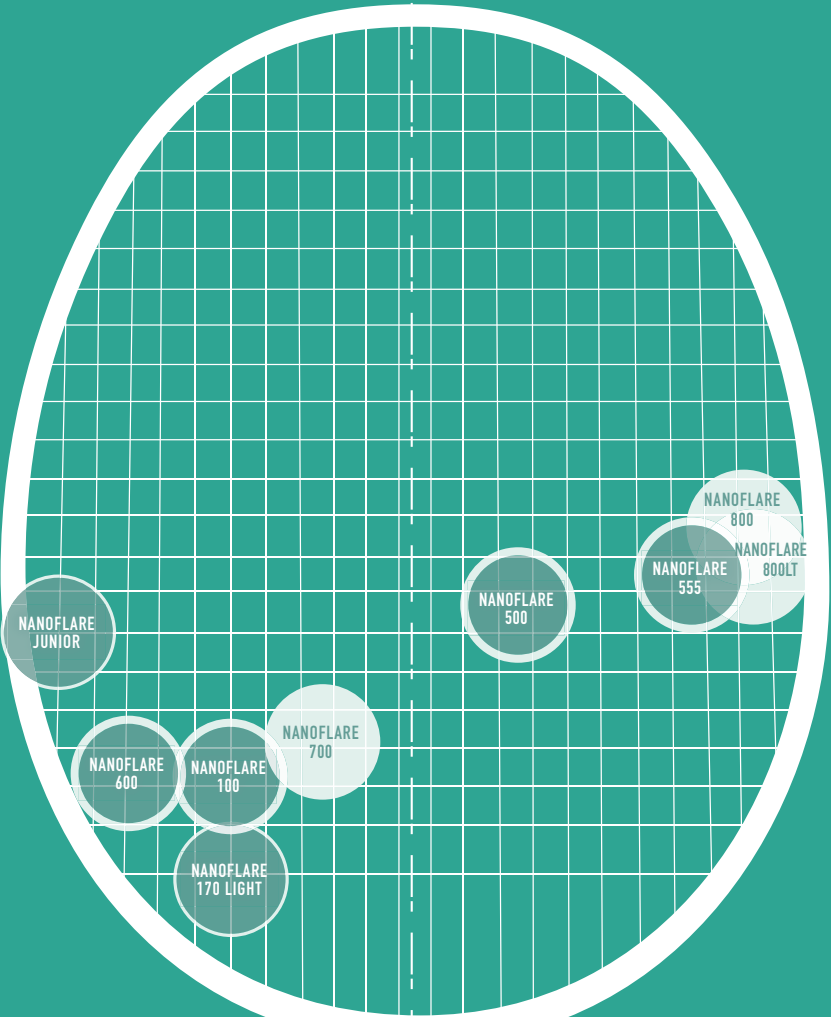

The difference is in the technology – built for speed, the NANOFLARE, is constructed with the SONIC FLARE SYSTEM which strategically lines high modular graphite material at the top and bottom of the frame for amplified repulsion performance.

NANOFLARE 700

SONIC FLARE SYSTEM

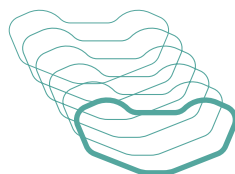

The revolutionary graphite material TORAYCA™ M40X and high modulus graphite provide unrivalled power and stability for maximum shuttle acceleration.

*TORAYCA™ M40X is a next-generation carbon fiber developed by Toray Industries, Inc.

NEW AERO FRAME

Engineered for speed, AERO Frame technology is built to flex on impact and immediately snapback, helping launch the shuttle further and faster.

ACCURACY

MASTER OF PRECISION

The acclaimed ARCSABER series designed for control is reimagined with emphasized shuttle-pocketing for a controlled offense and one-of-a-kind feel at impact.

Taking control of the court can come in all different forms. For the ARCSABER, that comes from the extra few milliseconds of shuttle contact time allowing assertive shot-making. Combine that with the stability of the enhanced ARCSABER frame, you gain the confidence to command the court.

ENHANCED ARCSABER FRAME

Control with confidence through this unique frame structure with varying levels of flex from top, sides, to bottom, built to increase shuttle hold while reducing instability and twisting at impact.

TORQUE-TO-FLIGHT SHAFT

The shaft is designed with optimal twist for improved control and flight.

POCKETING BOOSTER

The frame is lined with POCKETING BOOSTER, a proprietary rubber-like material emphasizing elasticity in the frame's flex.

DUORA

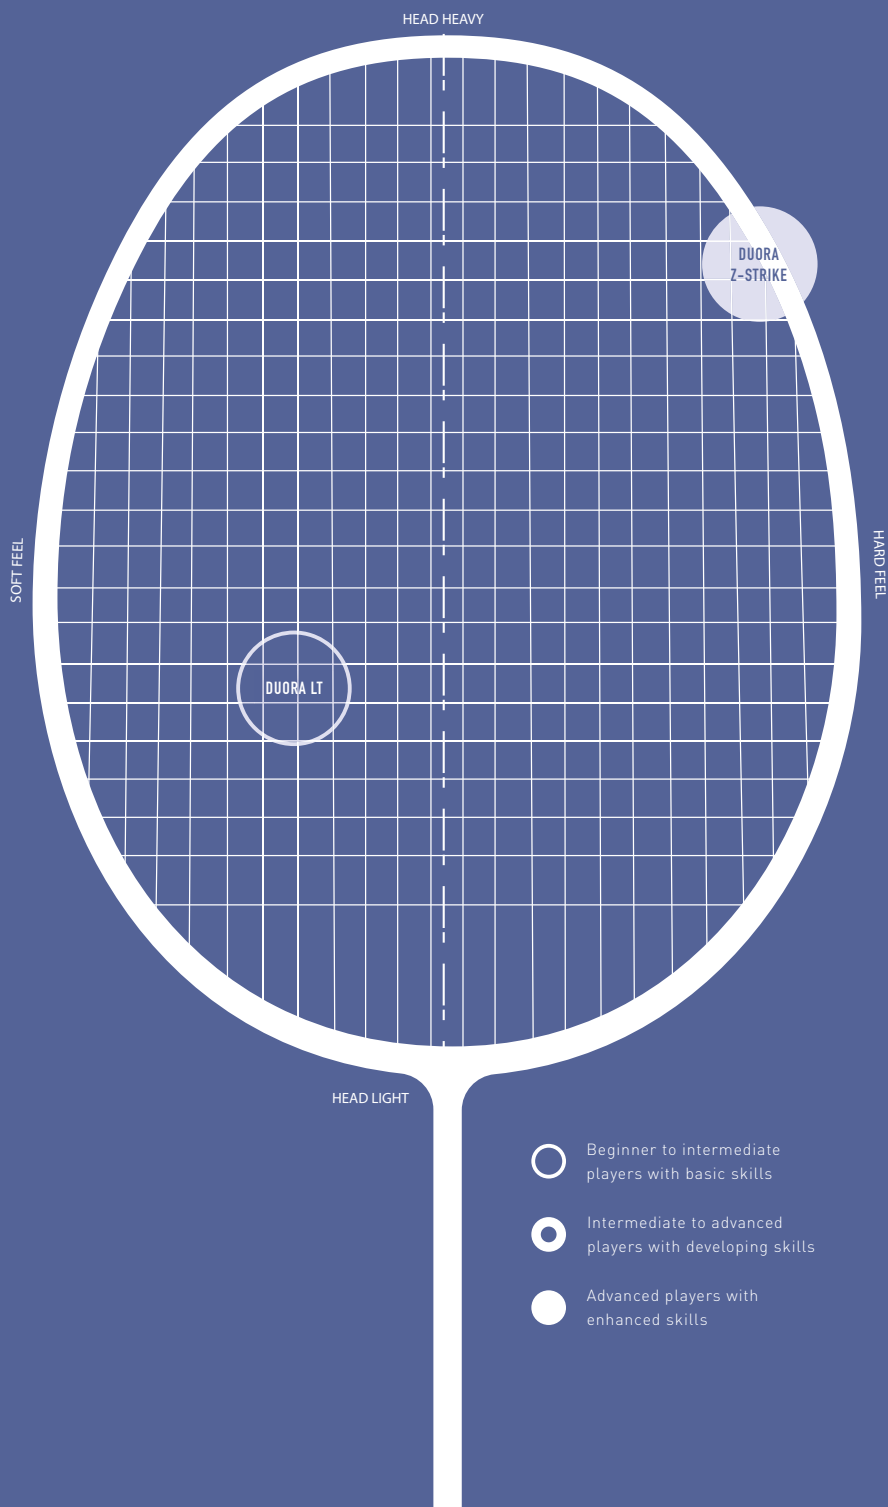

DUAL IMPACT

With two contrasting racquet profiles built into one frame, the DUORA is designed to bring an all-around blend of power, speed and control to a player's game.

Combining technology that enhances both forehand and backhand swings, the DUAL OPTIMUM SYSTEM remains sleek in design. Constructed with NANOMETRIC DR*, a lightweight graphite material weighing 60% less than conventional graphite, the DUORA offers players unparalleled swing speed, firmer shuttle hold, and enhanced repulsion for explosive shots.

DUORA

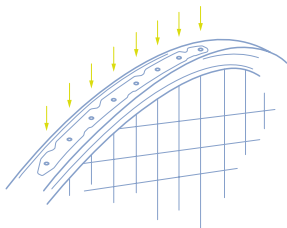

DUORA

- Beginner to intermediate players with basic skills
- ◐ Intermediate to advanced players with developing skills
- Advanced players with enhanced skills

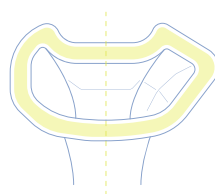

DUORA GROMMET DESIGN

8 linked grommets made with differing thicknesses on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

NANOMETRIC DR

NANOMETRIC DR is an enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

DUAL OPTIMUM DESIGN

Two contrasting racket profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand.

Command the court with powerful forehands and speedy backhands.

NANOSCIENCE

YONEX racquets are precisely engineered using technology on a molecular level that's invisible to the naked eye but make a visible difference to the racquet performance. The NANOSCIENCE technology allows YONEX to alter the structure of the materials in the racquet to build strength, flex and power exactly where it's needed. That's what gives YONEX racquets the leading edge.

Namd

A world-first, new dimension graphite material, Namd, produces more flex with a faster snapback, unleashing dramatic power. (Namd is a technology developed by Nitta Co., Ltd.)

NANOAIR SPRING

Tiny air pockets within the graphite improve energy transfer to the shuttle

NANOCCELL NEO

A resilient yet surprisingly flexible graphite material providing increased power.

NANOMESH NEO

The First Generation of graphite: Gives a stronger and more flexible frame. The shaft flexes more, building up energy. This material helps to return to its original state.

NANOMESH + CARBON NANOTUBE

Unique structural carbon materials are an integral part of the NANORAY racquet series. Incorporated into parts of the frame and shaft they increase strength, give sharper handling and boost repulsion power.

NANOMETRIC

Tightly bonded fibers enhance the racquet's strength and minimize twisting during impact. NANOMETRIC is a material which applies the NANOALLOY™ technology of Toray Industries, Inc.

NANOMETRIC DR

An enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

NEO CS CARBON NANOTUBE

Offering greater flexibility, great durability and repulsion power, NEO CS CARBON NANOTUBE delivers outstanding performance when you need to hit powerful, controlled shots.

M40X

A next-generation highly strong, yet elastic carbon fiber developed by Toray Industries, Inc. (TORAYCA M40 X is developed by Toray Industries, Inc.)

X-FULLERENE

Used in the resin which bonds the carbon fibers, resulting in a tenfold increase in binding force which makes it possible to create 5% higher repulsion power and 15% greater stability than conventional graphite.

MATERIAL HIGHLIGHTS

HYPER-MG/EX-HMG/ SUPER HMG

These ultra-elastic graphite materials increase repulsion, putting sharper power into smashes, drives, clears and many other shots.

IC ELASTOMER

This soft elastomer material increases dwell time for greater power transfer to the shuttle.

LIGHT FEEL CARBON NEO

Combining rubber particles with carbon fiber generates a light feel and flexibility at impact.

NICKEL TITANIUM FIBER

This titanium material provides increased stiffness in the racquet frame along with strong form retention, allowing for quick repulsion.

REXIL FIBER

This original high quality material was developed by YONEX to exceed the repulsion and shock absorption properties of normal materials.

SONIC METAL

An ultra-stiff material incorporated into the lower part of the frame. SONIC METAL gives an aggressive snap-back effect, increasing repulsion power and producing an attacking sound.

SOUND FILTER

Intimidate your opponent with an aggressive sound of a YONEX racquet equipped with Sound Filter. Using material engineered into the racquet frame, the technology filters only the sound required for a powerful and commanding tone during play.

T-ANCHOR

Increases stiffness for quicker racquet recovery into the next shot.

TUNGSTEN

A metal with a high tensile strength.

VDM (VIBRATION DAMPING MESH)

Vibration dampening material is a stretchy mesh rolled with the graphite to greatly reduce unwanted vibrations.

VIBSLAYER CARBON

VIBSLAYER CARBON is a material incorporated into the bottom-half of the frame. Made with ultra-thin layers of shock-absorbing material* between layers of carbon, players experience the same level of repulsion power generated by normal carbon with greatly reduced shock impact, cutting down on fatigue and stress on the body.

*VIBSLAYER CARBON utilizes shock-absorbing materials developed by Toray Industries, Inc.

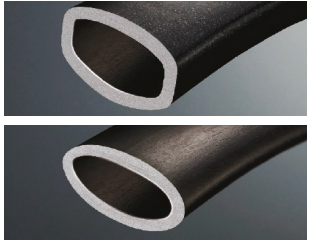

FRAME TECHNOLOGY

AERO + BOX FRAME

AERO Frame: The AERO Frame cuts air resistance for a faster swing.

BOX Frame: The BOX Frame has an ultra-stiff profile for a solid feel.

AERO + BOX Frame: AERO and BOX frame profiles are combined on some racquets to give both a faster swing and more solid feel.

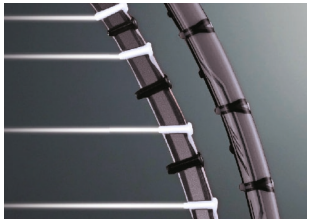

AERO + BOX VARIFRAME

Aerodynamic contouring of the top of the frame minimizes air resistance so air flows faster across the curved surface during the swing, transferring more speed and power into shots.

HORIZONTAL-A CONCEPT

This innovative grommet pattern allows strings to run horizontally, creating greater flex in the string bed providing an enlarged sweet spot at the top of the frame, in the smallest head yet.

DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand.

SONIC FLARE SYSTEM

The revolutionary new graphite material M40X is used across the bottom of the frame to provide unrivalled power and stability for maximum shuttle acceleration.

VERTICAL-A CONCEPT

The unique grommet pattern allows strings to run vertically through the string bed, adding more flex and creating a wider, enlarged sweet spot.

AERO FIN

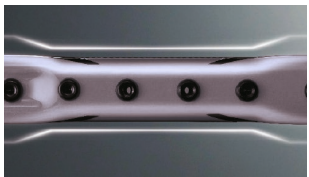

Fins positioned at the top of the frame reduce air resistance for improved swing speeds.

MUSCLE POWER FRAME

Muscle Power locates the string on rounded archways that eliminate stressload and fatigue through contact friction. This construction creates total unity of the string and frame through closer and tighter contact.

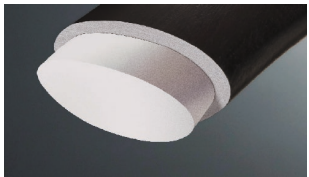

SBZ (SNAP BACK ZONE)

The slimmer section in the middle of the frame incorporates an elastic material called EX-HMG. This allows the frame to flex more on impact, repelling the shuttle at astonishing speeds.

SOLID FEEL CORE

Reduces vibrations traveling down the shaft for improved comfort.

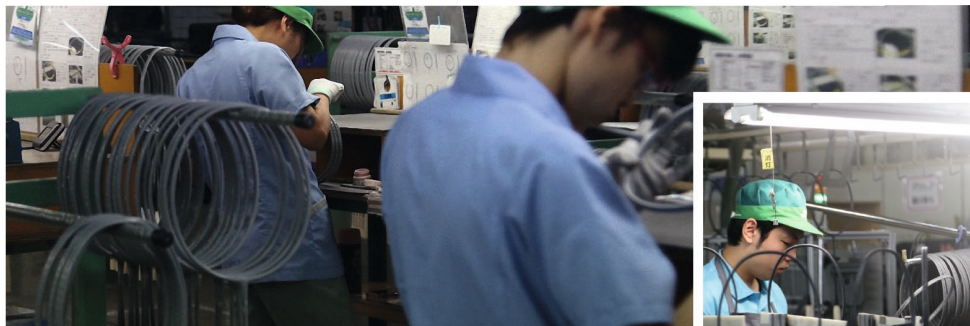

SBZ (SNAP BACK ZONE)

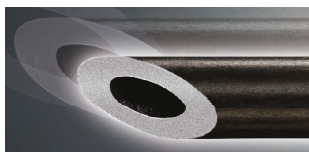

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the joint for maximum control. The transition to the next shot can be performed smoothly with a rapid succession.

COMPACT FRAME

The smaller frame size further reduces unwanted air resistance and improves feel.

SHAFT TECHNOLOGY

SLIM SHAFTS

YONEX slim shafts are designed to slice effortlessly through the air and have greater flex to generate extra power.

ULTRA PEF

YONEX shafts are constructed using lightweight Ultra Poly Ethylene Fibres that can withstand immense forces while soaking up unwanted shocks and vibrations.

JOINT TECHNOLOGY

NEW BUILT-IN-T-JOINT

Inserted into a number of models the NEW Built-in T-Joint has a foaming agent where it meets the frame core, which increases the stability of the shuttle on the string bed.

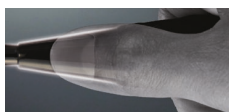

BUILT-IN-T-JOINT

Buried deep within the layers of graphite and carbon, the ultra-tough Built-in T-Joint reinforces the place where the shaft meets the head; increasing strength and eliminating twisting.

CAP TECHNOLOGY

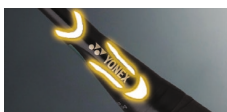

ENERGY BOOST CAP/ CAP PLUS

Uniquely shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the shaft from twisting.

CONTROL SUPPORT CAP

The Control Support Cap provides a wider flex at surface compared with an ordinary racquet for easier gripping, fast follow-through and the sharpest maneuverability.

TFA CAP

Provides extra shaft flex to accelerate frame recovery after impact. Also provides vibration dampening along with a comfortable fit on your thumb.

POWER BOOST CAP

The clever mix of stiff and flexible materials used in the POWER BOOST CAP allows for more shaft flex, generating additional power without losing stability.

OUR RANGE OF —

STRINGS

“CRAFTING EVERY SWEET SPOT.”

Choosing the right string is as important as choosing the right racket. That is why Yonex engineers put so much effort into designing innovative new products like the EXBOLT, a next-generation multifilament string. The EXBOLT is engineered with the proprietary FORGED FIBER, a thin yet radically durable outer, allowing the player to pierce through their opponent's defense with agile and high-velocity drives.

Innovation lies in the smallest details. Yonex never stops meticulously testing cutting-edge fibers and coatings, finding more efficient ways to craft stronger strings for every performance preference and level of play.

CRAFTING EVERY
SWEET SPOT

The Yonex Stringing Team is a global network of over 1,500 world-class stringers who are skilled in crafting the perfect sweet spot to meet every player's demands.

Equipped with state-of-the-art stringing machines that protect the integrity of every frame, these stringers are experts in optimizing every racket's performance. Each string is pulled and knotted with precision to ensure that players can rely on the consistency required to come out on top.

Ranging from the prestigious BWF World Championships and YONEX All England Open to Super 300 tournaments like the YONEX GAINWARD German Open, the Yonex Stringing Team comes together to provide their deep knowledge of equipment and expert dexterity for players to compete and the highest level of badminton.

STRINGING MACHINES

PRECISION 9.0

Made in Japan

Premium electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,020 mm (W) x 660 mm (D) x 1,070 mm - 1,370 mm (H)
WEIGHT	Approx. 73 kg / 161 lbs
PULL SPEED	9 speeds
TENSION RANGE	10-88 lbs [0.5 increments]; 4.4-39.4 kg [0.2 increments + 5]
PRE-STRETCH	1-20% [1% increments]
ITEM CODE	SPR90W

€ 12.000,00 (RRP)

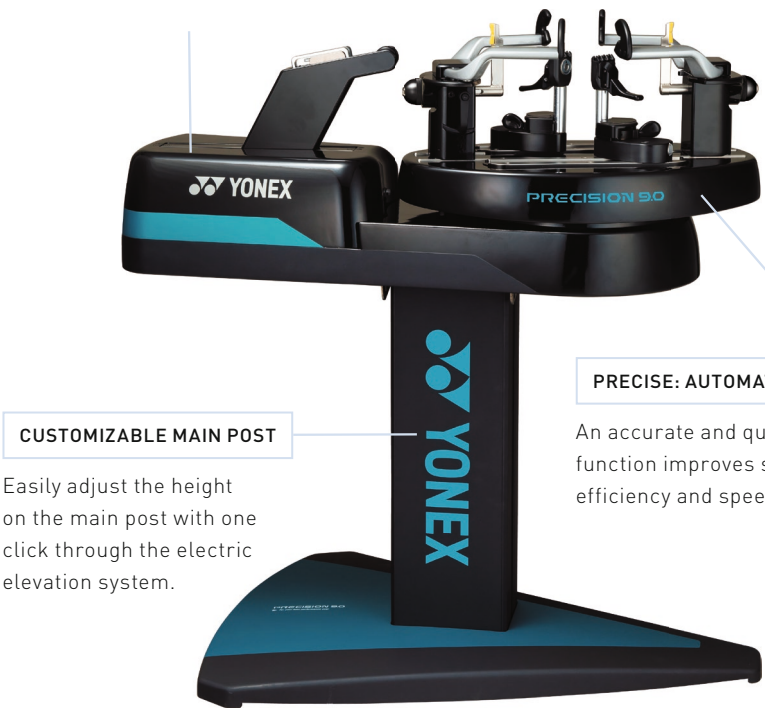

FEATURES

USER-FRIENDLY: STRINGING ENVIRONMENT

A control panel with angle, brightness, and sound adjustments, along with a USB charging port, create a comfortable stringing environment.

EFFICIENT: MOUNTING SYSTEM

Lower racket posts and a compact turntable combine to allow for smoother stringing, while improved gripping on the clamps results in less damage to the string.

CUSTOMIZABLE MAIN POST

Easily adjust the height on the main post with one click through the electric elevation system.

PRECISE: AUTOMATIC LOCK FUNCTION

An accurate and quick lock function improves stringing efficiency and speed.

MARCUS F. GIDEON (INA)

KEVIN S. SUKAMULJO (INA)

PRECISION 5.0

Electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,167 mm (W) x 685 mm (D) x 1,064-1,242 mm (H)
WEIGHT	Approx. 75 kg / 165 lbs
PULL SPEED	3 speeds
TENSION RANGE	11-82 lbs [0.5 increments]; 5-37 kg [0.2 increments]
PRE-STRETCH	0, 5, 10, 15, 20%
ITEM CODE	SPR50W

€ 6.000,00 (RRP)

FEATURES

EFFICIENT: RACKET FRAME SUPPORTS

The frame supports are easily adjustable with a one-click sliding functionality and head-size guides.

USER-FRIENDLY: CONTROL PANEL

Optimized for efficiency, the control panel is designed with large buttons for easy accessibility and improves accuracy. On the side is a USB port for convenient charging.

PRECISE: DISC BRAKE SYSTEM

A first for stringing machines, the PRECISION 5.0 turntable features a braking system utilized in cars and aircraft that enables quick reactions for improved accuracy.

ORGANIZED: TOOL TRAYS

Keep your tools organized with two tool trays - one tucks away below the control panel, and the second is located on the side of the machine.

SWING WEIGHT MACHINE

PRECISION SCAN

Electronic tennis, badminton, and soft tennis weight and balance machine

SIZE	Approx. 700 mm (W) x 453 mm (D) x 283 mm (H)
WEIGHT	Approx. 15 kg / 33 lbs
ITEM CODE	SPRSC

€ 2.500,00 (RRP)

FEATURES

Precisely scan the total weight and balance of rackets by placing the racket on the machine with a touch of a button.

QUICK SCAN: COMPUTER UNIT

The computer unit will provide the total weight, balance, swing weight, and performance swing weight.

Performance swing weight is a Yonex-exclusive measurement - more accurate than normal swing weight - and is calculated by using the values of the total weight, racket balance, and swing weight.

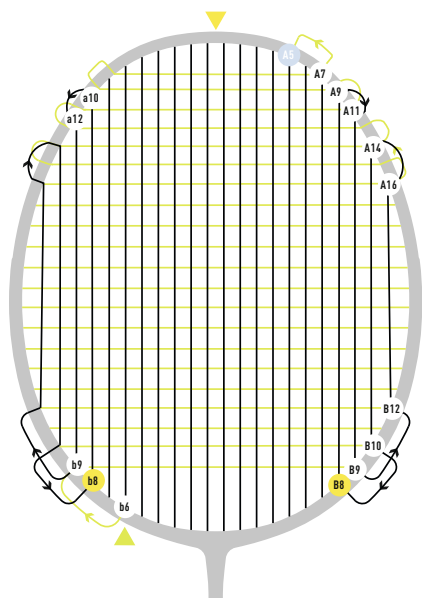

ACCURATE: COVER, BAR, RING

The acrylic cover protects the machine's three main sensors while not in use.

A calibration bar and calibration ring is provide to ensure the machine gives accurate swing weight measurements.

SHUTTLECOCKS

“CRAFTING EVERY SWEET SPOT.”

Since 1965, Yonex has manufactured feather shuttlecocks widely known to deliver a consistent stable flight, and class leading durability. Manufactured with incredible attention to detail, players can trust in a quality shuttle that performs the same every time.

Yonex shuttlecocks are seen on the international stage, providing premium flight for some of the highest level tournaments such as the BWF World Championships and YONEX All England Open.

FEATHER SHUTTLECOCKS

Yonex has been meticulously hand-crafting the best feather shuttlecocks in the world since 1965. Each of our shuttles is assembled by a team of expert craftsmen using the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That's why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

SHOES
PRODUCTION

LIGHTWEIGHT

msLITE X

msLITE X is Yonex's lightest midsole material and is one of the key technologies in making the AERUS Z lighter while providing smooth, fluid footwork.

SEAMLESS UPPER DESIGN

The seamless upper design is reinforced with wear resistance material and film in each area to achieve lightweight, high breathability and support. It maintains comfort even if you play for long time.

POWER CUSHION, POWER CUSHION+, Power Graphite Sheet, Double Russel Mesh, Durable Skin Light Feather Bounce Foam, Synchro-Fit Insole, Toe Assist Shape, 3D Power Graphite Sheet /Hexagrip Sole, Round Sole

CUSHIONING

The POWER CUSHION COMFORT series is characterized by its high cushioning performance and propulsion.

POWER CUSHION+

Features POWER CUSHION+ in the midsole and in the heel, resulting in reduced stress on the knees and ankles.

3D POWER GRAPHITE DRIVE

Yonex's proprietary graphite sheet is built to flex and generate power with each step, while providing stability from unwanted twist.

FEATHER BOUNCE FOAM

A lightweight, high repulsion material built to support agile, fast paced footwork. 8% lighter in weight, while generating 20% more repulsion than the previous model.

POWER CUSHION+, Radial Blade Sole, Feather Light X, Flexion Upper, Toe Assist Shape, Synchro-Fit Insole, 3D Power Graphite Drive, Feather Bounce FOAM, Inner Bootie, Durable Skin Light, Round Sole

STABILITY

Give your footwork the confidence that comes with stability.

RADIAL BLADE SOLE

Designed for confidence in directional change. A new sole pattern increasing traction in vertical, horizontal and diagonal movements.

SEMI-ONE PIECE SOLE

Toe and heel rubber soles combined into a singular piece for improved stability, and for more traction through additional surface area.

LATERAL SHELL AND STABILITY REINFORCEMENT

To reduce lateral shake and improve stability, the hardened shell like portion, LATERAL SHELL, is applied to support the most burdened part and reinforced parts on the outer midfoot to the heel.

OUR RANGE OF —

ACCESSORIES

“PREPARE FOR PERFORMANCE.”

The connection between your hand and the racket is often overlooked but can make the biggest difference.

Yonex designs a range of overgrips to fit every player's preference. From Super Grap - Yonex's most popular overgrip that has been sold enough to wrap around the world five times - to Dry Grap, which wicks away moisture and provides a dry feeling even in humid conditions, every Yonex overgrip is designed to make the connection between your hand and your racket one you can trust.

**5X
AROUND
THE WORLD**

ACCESSORIES / OVER GRIPS

SUPER GRAP

Tacky feel

Since its launch in 1987, the Super Grap has become Yonex's best-selling overgrip, having sold enough grips to wrap five times around the earth.

The Legends' Vision

YONEX

The Legends' Vision initiative brings together superstars from past and present with a mission of introducing badminton to new audiences and igniting a lifelong passion for the sport. Founded by **Lee Chong Wei, Lin Dan, Peter Gade, Taufik Hidayat and Lee Yong Dae**, this World Tour offers fans the opportunity to be inspired by The Legends at coaching clinics, Q&A talks and exhibition matches.

Through interactive events that get people excited about the sport of badminton, the Legends' Vision leaves a lasting legacy in every country it visits. Since the Legends' Vision tour began in 2015, its success in attracting new badminton fans from all corners of the globe has been unparalleled, and we hope that this will continue to grow as we add more events to the tour in the very near future.

To learn more about this initiative, head to **Legends.Yonex.com**.
